1 installation Guide

1.1 System requirements

At least the following system configuration is required for the installation of our Shopware Custom-CMS-Block-App:

- PHP 7.2 or higher
 - Shopware 6.3.0 or higher
-

1.2 installation

There are two options for installing the app:

- *Adding via the App Manager in the backend*
To do this, you first have to connect the App Manager to your Shopware account. You can then use the apps purchased for this domain. You can now add the app via "Load app".
- *Add via SFTP*
Download the .zip file of the app from your Shopware account and unzip it on your PC / laptop. Then you have to start an SFTP client and copy the unzipped folder into the following directory of your Shopware installation:
SHOPWARE_ROOT_VERZEICHNIS / custom / plugins /

After both variants, you still have to install the app. You can find the added app under "My extensions" and you can install it using the context button and then activate it.

Illustration 1: Install app

Illustration 2: Activate the app

2 Setting up the app

2.1 Adding to a world of experience (CMS page)

Open or create a Adventure World page on which the block should be displayed. Then open the block editor and select the “Dynamic CMS Element” tab in the “Block Category” selection menu. Drag and drop the block into the desired area of the page.

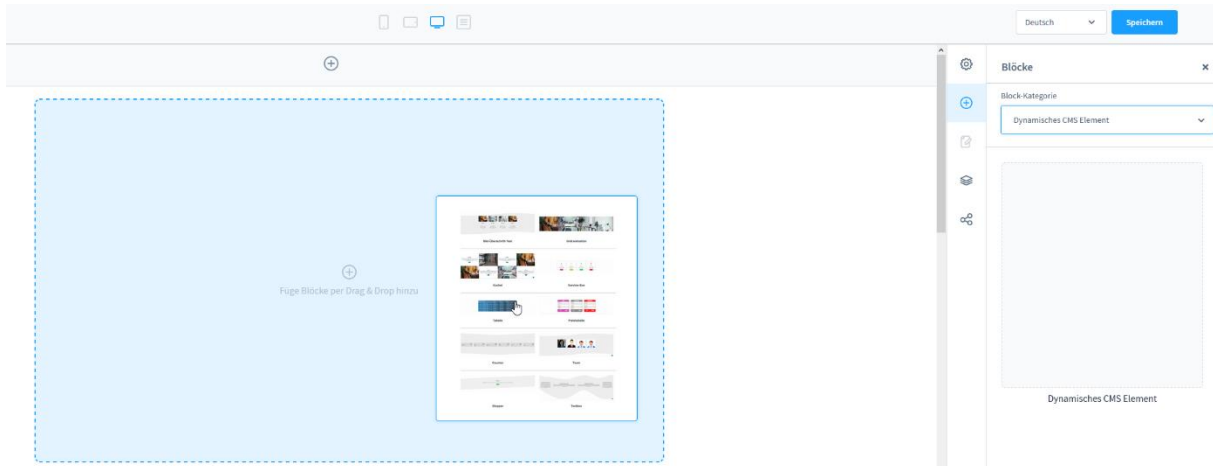

Illustration 3: Include block in CMS page

2.2 Open settings

Open the block settings

Illustration 4: Open settings

2.3 Basic settings

In the "Basic Settings" tab you can make various block settings.

2.3.1 General CMS section settings

If a background with transition is to be selected for the block, it often looks nicer if this block runs over the entire width of the page. To set this, the CMS section must be set to its full width. (The content block can then, if desired, be set narrower (in point 2.3.2))

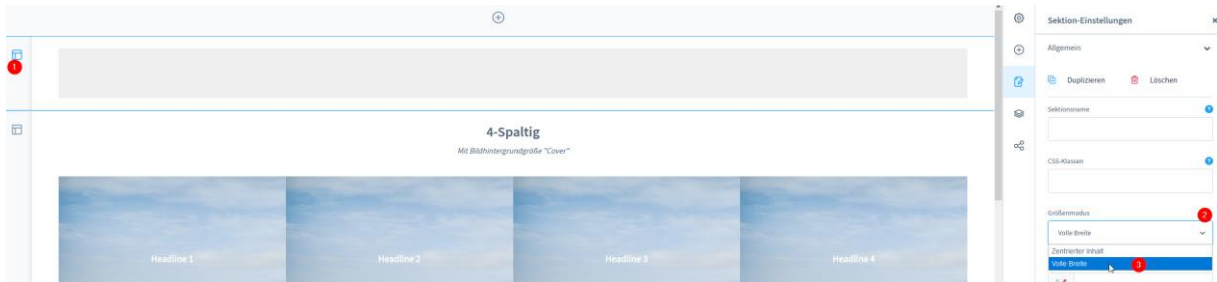

Illustration 5: Adjust the section width

2.3.2 Column options

Spaltenoptionen

The screenshot shows the 'Spaltenoptionen' (Column Options) settings panel. It features a dropdown menu for 'Anzahl der Spalten auswählen' (Number of columns to select) set to '3'. Below this are three dropdown menus for 'Breite der Spalte einstellen 1', 'Breite der Spalte einstellen 2', and 'Breite der Spalte einstellen 3', all set to '4 / 12'. At the bottom, there is a toggle switch for 'Kontentbreite verkleinern?' (Reduce content width?) which is currently turned on.

Illustration 6: Column options

- Number of columns: Enter a number of columns from 1-6. You can also add or remove further columns later without losing the data of the columns entered so far.
- Width of the columns: By default, the same width is always preselected for the columns. You can adjust the column width individually. Note, however, that the maximum column width is 12, e.g. 3x 4/12 or 2x 5/12 and 1x 2/12 (each with three columns)
- Reduce content width: This setting is useful if you have set the CMS sector to full width (as in point 2.3.1). When this option is activated, the background remains across the entire width, but the columns are displayed in boxed mode (not across the full width)

2.3.3 Background options

Here you can make the settings for the block background:

- **No background**

Hintergrund-Optionen

Hintergrund auswählen
 Keinen Farbe Bild

Illustration 7: Background without

- **colour**

Hintergrund-Optionen

Hintergrund auswählen
 Keinen Farbe Bild

#ffffff

Farbverlauf für Hintergrund einstellen?

Farbe für Hintergrundverlauf einstellen

#b5b5b5

Illustration 8: Background color

Above you set the main background color. If you activate the gradient, you can set the second color for the gradient in the lower field. The course always runs from left to right. (The colors set here are automatically adopted for the transitions when the transition is activated (point 2.3.5))

- **picture**

Hintergrund-Optionen

Hintergrund auswählen

Keinen Farbe Bild

...

Dateien hochladen

Medien öffnen

Hintergrundbildmodus auswählen

Cover

Hintergrundposition auswählen

Fest

Illustration 9: Background image

Select an image from your library above or upload a new one. In the background mode you can set whether the image should be displayed over the entire screen size or just over the width of the screen.

- Cover = entire screen
- Contain = the image is adjusted to the width of the screen

With the background position you can set whether the background should be fixed or scrollable.

2.3.4 Height options

Here you can set a minimum height for the block. Just enter a value in px (enter without px e.g. 500)

Höhenoptionen

The screenshot shows a light gray rectangular panel. At the top left, there is a blue radio button that is selected, with a mouse cursor hovering over it. To the right of the radio button is the text "Benutzerdefinierte Mindesthöhe für Block einstellen?". Below this, the text "Min-Höhe in px eingeben" is displayed above a white rectangular input field with a thin gray border.

Illustration 10: Set the minimum height

2.3.5 Transition options

Here you can define a stylish transition of the block. The main colors are taken from these settings, provided that "Color" has been specified as the background.

Übergangsoptionen

Übergang für Block anzeigen?

Übergangstyp auswählen

Wellen

Übergang oben anzeigen?

Hintergrundfarbe des oberen Übergangs einstellen

#ffffff

Übergang unten anzeigen?

Hintergrundfarbe des unteren Übergangs einstellen

#ffffff

Illustration 11: Transition options

- Activate / deactivate transition
- Choose a transition type. You can get more information via the question mark
- Deactivate / activate the upper transition
- Set background color. This setting should only be changed if the main design is not based on a white background.
- Deactivate / activate the lower transition
- Set background color. This setting should only be changed if the main design is not based on a white background.

2.3.6 Animation option

Here you can set whether the elements should be displayed via an animation. You also define the duration of the animation here. You can set the animation direction in the respective column element.

Optionen für die Animation

The screenshot shows a light gray dialog box titled "Optionen für die Animation". It contains a blue question mark icon in a circle at the top left. Below it is a radio button that is currently selected, with the text "Animation für Spaltenelemente einschalten?". Underneath this is the instruction "Zeitdauer in Sekunden einstellen z. B. 1.5". At the bottom, there is a white text input field with the number "0.8" entered.

Illustration 12: Animation option

2.3.7 Column type

Here you can set the desired element for the block. The pictures show you a preview of a possible layout.

Please note that with the counter block only one block can be used per CMS page.

2.4 Global content settings of the block type

As soon as you have selected a column type from point 2.3.7, further tabs for the configuration appear at the top. The number of tabs with "Column" depends on the settings from point 2.3.2.

Illustration 13: Global content settings

2.4.1 Global settings for the element "Image, heading text"

Globale Bildeinstellungen

The 'Globale Bildeinstellungen' panel contains two toggle switches and two input fields. The first toggle is 'Runde Ecken anzeigen?' (Show rounded corners?) which is turned on. Below it is the label 'Eckenrundung in Prozent einstellen' (Set corner rounding in percent) and an input field containing the value '20'. The second toggle is 'Benutzerdefinierte Breite für Bild einstellen?' (Set custom width for image?) which is also turned on. Below it is the label 'Breite für Bild in px einstellen' (Set width for image in px) and an input field containing the value '300'.

Globale Texteneinstellungen

The 'Globale Texteneinstellungen' panel contains one label and one input field. The label is 'Textfarbe für Überschrift einstellen' (Set text color for heading). Below it is an input field for a color code, showing a small black square icon followed by the hex code '#4a545b'.

Illustration 14: Global settings image, heading, text

- Active "round corners" to create a curve in the pictures. Enter the degree of rounding below from 0-50
- If you want to set your own image width for the images, activate the option and enter the width in px (entry without px e.g. 300)
- Change the colors of the headings via the global text settings. You can enter the color of the actual texts later in the editor of the column option

2.4.2 Global settings for the element "Animated grid layout"

Globale Rasterlayout-Einstellungen

Größe des Hintergrundbildes einstellen

Cover

Separate Textfarbe für Bildsektion einstellen?

Textfarbe einstellen

#222

Separate Buttonfarbe einstellen?

Hintergrundfarbe des Buttons einstellen

#008490

Illustration 15: Global settings for animated grid layout

- Background image size:
Choose whether the image within the column should be scaled over the size of the entire page or whether the image should be scaled to the block width
 - o Cover: full width
 - o Inherit: width of the block
- Set colors for all elements of text color and button color. You can also activate individual colors via the respective options. The global settings disappear and you can configure the colors in the respective column options.

2.4.3 Global settings for the element "Tile layout"

Globale Bildeinstellungen

Runde Ecken anzeigen?

Eckenrundung in Prozent einstellen

20

Benutzerdefinierte Breite für Bild einstellen?

Breite für Bild in px einstellen

300

Globale Text Einstellungen

Textfarbe für Überschrift einstellen

#4a545b

Illustration 16: Global settings tile layout

- Active "round corners" to create a curve in the pictures. Enter the degree of rounding below from 0-50
- If you want to set your own image width for the images, activate the option and enter the width in px (entry without px e.g. 300)
- Change the colors of the headings via the global text settings. You can enter the color of the actual texts later in the editor of the column option

2.4.4 Global settings for the "Service Box" element

Globale Service-Box-Einstellungen

Separate Service-Box-Farbe einstellen?

Farbe der Service-Box einstellen

#0bbbc1

Textfarbe der Servicebox einstellen

#222

Textfarbe des Buttons einstellen

#fff

Illustration 17: Global settings service box

Enter the colors for the service boxes here, if they should all have the same color. Activate the option "Separate service box colors" and you can set individual service box colors in the column options.

2.4.5 Global settings for the "Table" element

Globale Tabelleneinstellungen

Anzahl der Tabellenspalten einstellen ?

Anzahl der Tabellenzeilen einstellen ?

Ausrichtung des Tabelleninhalts einstellen

Farbe des Textes einstellen

Farbverlauf in der Tabelle anzeigen?

Hauptfarbe für Tabelle einstellen

Verlaufsfarbe für Tabelle einstellen

Illustration 18: Global settings table

- Enter the number of table columns (maximum 10)
- Enter the number of table rows
- Choose the alignment of the text within the columns
- Set the text color
- Set the background color and, if necessary, a background color gradient. The color gradient always runs from left (main color) to right (gradient color)

2.4.6 Global settings for the "Price table" element

Globale Einstellungen der Preistabelle

Anzahl der Merkmale einstellen

3

Merkmal 1

Merkmal 2

Merkmal 3

Preis 'ab' anzeigen?

Zeige wiederkehrende Zahlung?

Wähle wiederkehrende Zeit aus

wöchentlich
monatlich
quartalsweise
halbjährlich
jährlich

Illustration 19: Global settings price table

- Select the number of features (maximum 10)
- Depending on the number of features, enter the text for the feature
- Show the text "Price from" in the table
- Show recurring payments and select them in the dropdown

2.4.7 Global settings for the "Counter" element

Globale Zählereinstellungen

Illustration 20: Global settings counter

- Select the colors for the counters here, provided they should always be the same color. With the respective option you can set individual color settings and then adjust them in the respective column options.

2.4.8 Global settings for the "Employee" element

Globale Einstellungen für Teammitglieder

Illustration 21: Global settings employees

- Deactivate / activate the respective options for the display in the front end

2.4.9 Global settings for the "Stopper" element

Globale Stopperelement-Einstellungen

Benutzerdefinierte Textfarbe für Elemente einstellen?

Textfarbe einstellen

#222

Separate Buttonfarbe einstellen?

Hintergrundfarbe des Buttons einstellen

#008490

Textfarbe des Buttons einstellen

#fff

Hintergrundfarbe des Buttons beim hover einstellen*

#00616a

Textfarbe des Buttons beim hover einstellen*

#fff

Illustration 22: Global settings stopper

Adjust the colors for all columns here. If you use several columns for this element and want different colors, you can activate the respective options and set the colors in the column options.

2.4.10 Global settings for the "Textbox" element

This element currently has no global settings. All settings can be set in the column options.

2.5 Column type column options

2.5.1 Settings for all column types (if the animation has been activated in the global block settings)

Optionen für die Elementanimation

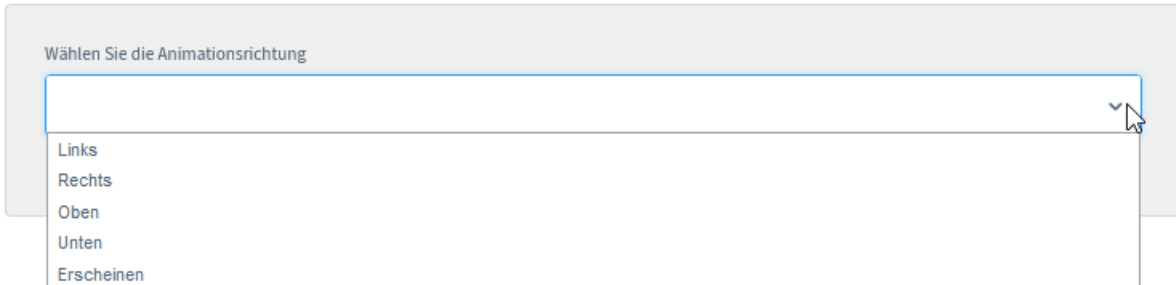

Illustration 23: Settings animation direction

The value set here corresponds to the start of the animation of the column when scrolling.

2.5.2 Column settings for the element "Image, heading, text"

Optionen für den Inhalt

- Text selection:
 - o Enter the text for the text area. You can use all editor options here, e.g. color, text size, font style and much more
 - o Enter the URL and the visible text of the button and choose whether the link should be opened in a new browser tab
 - o Determine the position of the button

- Set whether you want to have separate button colors or whether the settings should be adopted from your theme.
- Selection picture:

Optionen für den Inhalt

The image shows a settings panel with a light gray background. At the top, it is titled "Optionen für den Inhalt". Below the title, there are two main sections. The first section is labeled "Text oder Bild anzeigen?" and contains a white dropdown menu with the word "Bild" selected and a small downward arrow on the right. The second section is labeled "Inhaltsbild einstellen" and features a large rectangular area with a light gray and white checkerboard pattern, indicating a placeholder for an image. To the left of this area is a small blue circle with a white question mark, and to the right is a small icon of a picture with a plus sign, representing an image selection or upload button.

Illustration 27: Column settings tile layout image

- Select an image from your media library or upload a new one.
Please note that only a dummy image is displayed in the admin preview and not the uploaded / selected image.

2.5.5 Column settings for the "Service box" element

Optionen für den Inhalt

Fontawesome-Symbol eingeben

Gehen Sie zur [FontAwesome-Website](#) und kopieren Sie ein beliebiges Element.

1. Suchen Sie ein passendes Symbol in der Liste
2. Tippen Sie auf den HTML-Code
3. Gehen Sie zurück zum Admin und fügen Sie ihn ein
(siehe Hilfetext für weitere Informationen)

Text für Überschrift eingeben

Inhaltstext einstellen

URL eingeben*

Eingabe Button text

Link in einer neuen Registerkarte öffnen?*

Illustration 28: Column settings service box

- Enter the value for the icon. You can find out how this works in the description or as a small video if you go over the question mark
- Enter the text for the headline
- Enter the text for the text area. You can use all editor options here, e.g. color, text size, font style and much more
- Enter the URL and the visible text of the button and choose whether the link should be opened in a new browser tab

2.5.6 Column settings for the "Table" element

Werte in Tabelle eingeben

The screenshot shows a table editor interface. At the top, there are three column headers labeled "Spalte 1", "Spalte 2", and "Spalte 3". Below these, there are six rows. The first row is labeled "Überschrift" (Header) and the subsequent five rows are labeled "Reihe 1" through "Reihe 5" (Rows 1 through 5). Each cell in the table is represented by a white rectangular box. At the bottom of the interface, there is a horizontal scrollbar with a mouse cursor pointing to it, indicating that the table content can be scrolled horizontally.

Illustration 29: Table column settings

- Here you can enter the values as in a normal table. Note that you have to scroll to the right depending on the number of columns

2.5.7 Column settings for the "Price table" element

Einstellungen für die Preistabelle

The configuration panel is titled "Einstellungen für die Preistabelle" and contains the following sections:

- Text für Überschrift eingeben:** A text input field for the headline.
- Farbe der Preistabelle einstellen:** A color selection field with a small color palette icon on the left.
- Textfarbe der Preistabelle einstellen:** A text color selection field with a small color palette icon on the left.
- Preis für Preistabelle eingeben:** A text input field for the price value.
- Wahr / Falsch von Merkmalen setzen:** A section with three rows, each containing a "Feature:" label and a toggle switch.

Illustration 30: Column settings price table

- Enter the text for the headline
- Choose the background and text color of the pricing table
- Enter the value for the pricing table
- Set whether the features are included in the price. When deactivated, a small red x appears in the frontend and when activated a green tick appears

2.5.8 Column settings for the "Counter" element

Artikelzähler-Optionen

Fontawesome-Symbol eingeben

Gehen Sie zur [FontAwesome-Website](#) und kopieren Sie ein beliebiges Element.

1. Suchen Sie ein passendes Symbol in der Liste
2. Tippen Sie auf den HTML-Code
3. Gehen Sie zurück zum Admin und fügen Sie ihn ein
